

## 2015 AAO Annual Session Table Clinics

The Table Clinic program will be held on Sunday, May 17 in the Moscone Center Room 301 from 9:30am-11:30am. Clinicians will be at their tables during this time to answer questions about their research.

\*- Denotes financial interest or visual enhancement

1. 3D cranial base landmarks: reliability and accuracy  
Mona Afrand, et al.  
Edmonton, AB, Canada
2. Oral breathing: new early treatment protocol  
Ornella Arena, et al.  
Cagliari, Italy
3. Friction produced by liquid glass-covered brackets and archwires  
Micaela Baldascino, et al.  
Montecatini Terme, Italy
4. Evaluation of culture effect on the facial esthetics of females with preferred facial appearance using 3D stereophotogrammetry  
Mohamed Bayome, et al.  
Seoul, South Korea
5. Genetics of teeth angulation and inclination in patients with overt malocclusion  
Hunter Boss, et al.  
Detroit, MI, USA
6. Condylar position in treated Class II subdivision malocclusion patients using CBCT assessed within 6 months of debonding  
Brett Bullard, et al.  
Detroit, MI, USA
7. Occlusion of patients with osteogenesis imperfecta : a comparison with the severity of the syndrome  
Cynthia Carbone, et al.  
Montreal, QC, Canada
8. Assessment of myofunctional therapy on restoring mature pattern of deglutition and nasal breathing in children before orthodontic treatment  
Natasha Cassir, et al.  
Montreal, QC, Canada
9. Physical proprieties of silicone addition and wax as interocclusal record material: a comparative study  
Lisbeth Castañeda, et al.  
Mexico, Mexico
10. Comparative analysis of bracket slot dimensions evaluating different manufacturing techniques  
J. DeMeo, et al.  
San Antonio, TX, USA
11. Planning and assessment of incisors torque improvement using clear aligners  
Tarek El-Bialy  
Edmonton, AB, Canada

12. Three-dimensional cone beam computed tomography study of pharyngeal airway dimensions in different antero-posterior skeletal classification patients  
David Ensley, et al.  
San Antonio, TX, USA
13. Interface evaluation with 4 adhesive systems by scanning electronic microscopy  
Jennyfer Jeanette Gomes Alcala, et al.  
Guadalajara, Mexico
14. Clear aligner in the multidisciplinary treatment of hopeless maxillary laterals  
Mario Greco, et al.  
Rome, Italy
15. A mathematical analysis of 56 craniofacial mid-sagittal plane definitions as related to a mid-sagittal plane of best fit  
M. Noam Green, et al.  
Detroit, MI, USA
16. Investigating the etiology and pathogenesis of primary failure of eruption (PFE)  
Heather Hendricks, et al.  
Chapel Hill, NC, USA
17. Mandibular second molar mesial movement combining clear aligner and TADs  
Lucilla Iacopini, et al.  
Rome, Italy
18. Prevalence of dental arch form with no orthodontic treatment  
Armando Ibarra, et al.  
Guadalajara, Mexico
19. Leveling of the second molar with a superelastic NiTi spring  
Emmanouil Inglezos, et al.  
Athens, Greece
20. Post treatment changes in Class II correction using the Forsus appliance  
Min Kim  
San Antonio, TX, USA
21. Guided bonding: the concept and bonding property  
Akira Komori, et al.  
Chiyoda-ku, Japan
22. Prevalence of congenitally missing teeth among dental students  
Zhanna Konovalenko, et al.  
San Francisco, CA, USA
23. Expression of the osteoblast membrane protein Bril in tooth and periodontal tissues during development and following tooth movement  
Shingo Kuroda, et al.  
Tokushima, Japan
24. Skeletal and dental stability of rapid vs. slow maxillary expansion (RME versus SME) in patients with posterior crossbite: a systematic review  
Connie Ling, et al.  
Edmonton, AB, Canada

25. AcceleDent as a means for pain reduction during orthodontic treatment  
Wendy Lobre  
San Antonio, TX, USA
26. Permanent molar decompensation after RPE banded on deciduous teeth in the mixed dentition  
Giuseppe Manti, et al.  
Trento, Italy
27. Manual orthodontic toothbrush with bent bristles  
Francisco Marichi, et al.  
Mexico, Mexico
28. Pain perception during orthodontic treatment : a comparison between Invisalign and self-ligating treatment  
Claire Masi-Damois, et al.  
Montreal, QC, Canada
29. Severe deepbite treatment with clear aligner and customized ramps  
Paola Mozzicato, et al.  
Rome, Italy
30. Comparison between two different rapid prototyping techniques for digital models  
Abigail Olguin, P. Aguilar  
Mexico, Mexico
31. Validity, reliability and reproducibility of digital models obtained with iTero (Align Tech) in comparison with plaster models  
Vincent-Claude Péroquin, et al.  
Montreal, QC, Canada
32. CHTCA - a new composite hard tissue cephalometric analysis\*  
Yudhistar Palla  
Khammam, India
33. CBCT analysis of the oropharyngeal airway dimensions before and after treatment with functional appliances  
Susan Rizk, et al.  
Detroit, MI, USA
34. Linear measurements on digital and traditional casts: comparison between examiners  
Davide Spadoni, et al.  
La Spezia, Italy
35. Shear bond strengths of orthodontic auxiliaries bonded to clear thermoplastic aligner materials using three adhesive systems  
Andrew Taylor  
San Antonio, TX, USA
36. Comparison of American Board of Orthodontics' cast-radiograph evaluation (ABO-CRE) scores of plaster and digital models  
Phillip Timmons, et al.  
San Antonio, TX, USA
37. A novel approach for measuring volumetric and linear changes in RED distraction patients  
Stephen Vaughan, C. Kau  
Birmingham, AL, USA

38. Changes in the untreated mandibular arch after a rapid maxillary expansion  
Selena Ventura, et al.  
Cagliari, Italy
